For distribution to the City Council and others, and copies for the dais.

Thank you,

Carl Petersen, MPA, CMC

City Clerk

CAUTION: EXTERNAL EMAIL

Happy Easter Carl,

Is there a way you can forward these documents to Dr. Justin Levitt from National Demographics Corporation? I am sure he will likely be at the City Council Meeting on Tuesday for the 6 PM meeting on District mapping. I have talked to him before but I did not think of getting his business card.

Thanks again,

Susan

Subject: 4/11/23 CC Meeting Public Comment with Districting Proposal

Hi Carl,

I hope you had a happy Easter/Passover/Ramadan.

I have done a lot of research on City Districting and have come up with a district map proposal with a copy of the district map I propose and a description of the planning areas that make up each district.

Please deliver the attached documents, including my public comment for the 4/11/23 City Council Meeting, to each City Council Member, City Manager Oliver Chi, Assistant City Manager Brian King, and Director of Community Development Tim Gehrich. You can pass them on to anyone else you feel should have or want a copy of my District Map proposal and district descriptions.

Thank you, once again, for your support and assistance.

With a smile,

Susan Sayre

Good afternoon Dr. Levitt,

I do not know if you remember me, but I had an enjoyable discussion with you at City Hall about Irvine districting. I wear a pink shirt that says “silence is not an option”.

I have been unable to get current documentation of the number of residents or residences in each Irvine village/planning area, so I based my first proposed map and district descriptions (see attached documents) on 2016 data on the number of residences and number of residences under construction in each of the planning areas.

I look forward to attending Tuesday’s District meeting and other future meetings.

Susan Sayre

f. <u>PA 18:</u> Laguna Altura	789
g. <u>PA 39:</u> Los Olivos Village	1750
h. <u>PA 33:</u> Irvine Spectrum Center	4313

District Election Map Formation: 4/11/23 CCMtg AI 51

Good afternoon. My name is Susan Sayre and I have lived in Irvine since 1981.

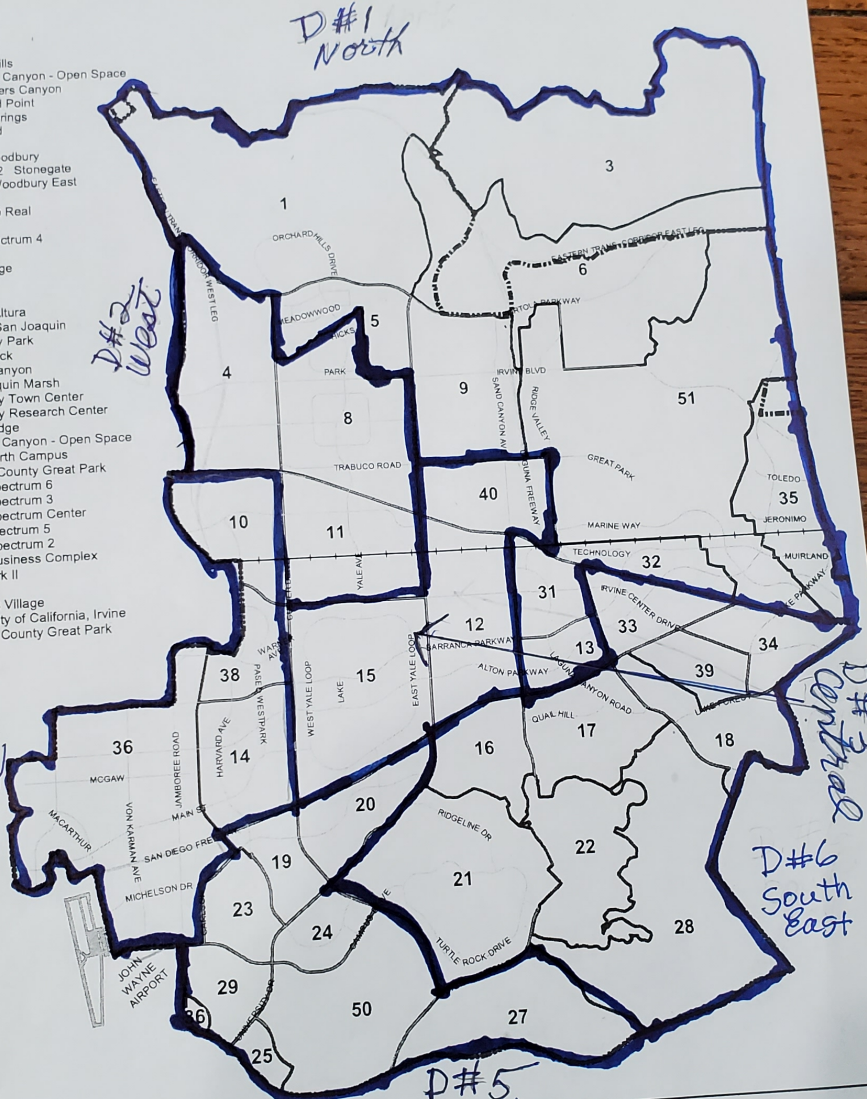

Irvine is a city made up of multiple village planning area communities, each of which were intentionally designed to have its own distinct features. Thus districts should be drawn to include adjoining village planning areas and should keep each village planning area community intact. Each district should have approximately the same number of residents.

You are asking for public input with regards to drawing district maps, however, the City Of Irvine is unable to provide sufficient data for the public to use to provide accurate map drawing proposals. I have been to City Hall, and there are no documents that give current number of residents in each of the village planning areas nor are there documents that provide the total number of current dwelling units in each of the village planning areas.

I have a 2016 document showing the number of existing dwelling units and the number of dwelling units under construction for each of Irvine's planning areas. I used this data to draw a proposal for a 6 district map. I also wrote a document which describes the planning areas that I propose be located in each of the 6 districts. Since Irvine has 2 universities, Concordia and UCI , that are located in close proximity to each other and have students who may be registered to vote in the location of their permanent residence, I suggest they not be placed in the same District. I have emailed my proposed district map and district descriptions to each of you Council members, City Manager Oliver Chi, Assistant City Manager Brian King and Director of Community Development Tim Gehrich in hopes that the documents provide a somewhat accurate indication of the number of residents that live in each of the planning areas.

As you are inviting public input in the district map drawing process, I ask that you provide the public with accurate data which they can use to provide meaningful input during the public meetings and on the map drawing website. Thank you.

To: Justin Levitt <districting@cityofirvine.org>

Dear Dr. Levitt,

I think you may find that many Irvine residents will want to keep Irvine Planning Areas/Villages intact and have districts with adjoining Planning Areas/Villages. Can you please provide a population map organized by Planning Areas which provides the population of each individual planning area? I notice that the Draw Map webpage provides a map with population designations, but it combines some planning areas that people may not want to have combined.

Thank you,

Susan Sayre

Thank you,

Susan Sayre
