Dear Dr. Levitt,

I think you may find that many Irvine residents will want to keep Irvine Planning Areas/Villages intact and have districts with adjoining Planning Areas/Villages. Can you please provide a population map organized by Planning Areas which provides the population of each individual planning area? I notice that the Draw Map webpage provides a map with population designations, but it combines some planning areas that people may not want to have combined.

Thank you,

Susan Sayre

Thank you,

Susan Sayre

Good morning,

Apologies for the delay in getting this map to you, but I have put together this map with total population from the 2020 Census by planning area.

One quick note - there are a few differences between where we have Census Blocks (the smallest areas the Census collects data for) and some of the planning areas. Mainly this is where the border is a hill or fence/property line rather than a road or canal. However, most of these areas aren't populated.

Please let me know if you have any questions,

Justin

Thank you for your submission! We'll make sure it gets processed for the third Public Hearing.

I'm happy to take additional maps as well!

Justin

Hi Justin,

Thank you ever so much for the Planning Area Map. Irvine residents, especially those who have lived in Irvine for a long time like myself (42 years) are very protective of our villages and our village communities.

I will work on my second District map which will be Map 3. I have one district map (district map 2) and the descriptions of the district make-up with populations which I made from the map you have on line. I will hand it in tomorrow morning at the community meeting at City Hall. I have attached it for you to review. It does not match planning areas so I have some changes to be made. I find that drawing districts that have equal populations is a difficult and time consuming process It is a lot harder than I thought it would be.

Thanks for reaching out to me and giving me a planning area map.

Susan

Wow...this is a difficult process! I have not found a way to make a district map keeping planning areas together and adjoining. Since the last census a lot more residents have moved onto the Great Park and North Irvine...they are not built out yet. so I am having those areas with smaller populations.

Thanks Justin,
Susan

Hi Justin,

Here are the 2 maps and the district descriptions for both map 2 and map 3 that you asked me to forward to you.

I am enjoying this process. Thank you so much,
